

HEARTH Handbooks for Building Officials

Indispensable Guides to Gas and Solid Fuel Hearth Systems

Make one part of your work easier and less stressful with the HEARTH Handbooks for Building Officials. These two comprehensive and convenient guides to all major hearth appliances and venting systems, Gas Hearth Systems and Solid Fuel Hearth Systems, are packed with information that will save you valuable time and energy. The Handbooks organize and clarify the world of hearth products — with helpful references to the sometimes difficult to find relevant sections of the major codes.

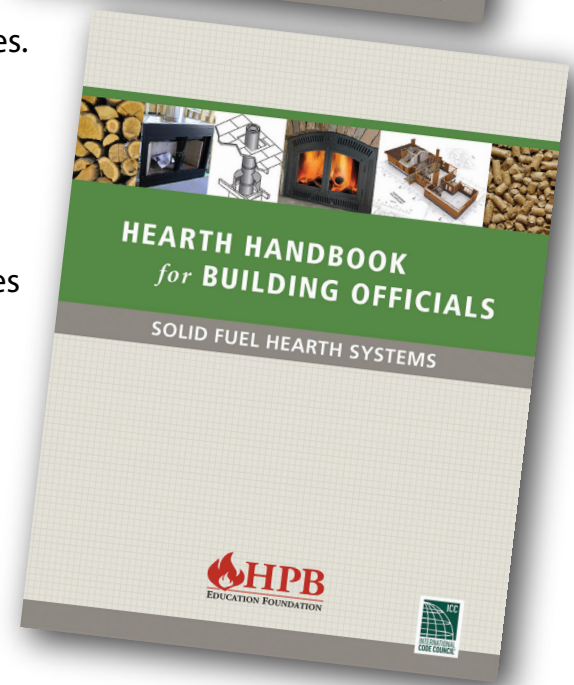

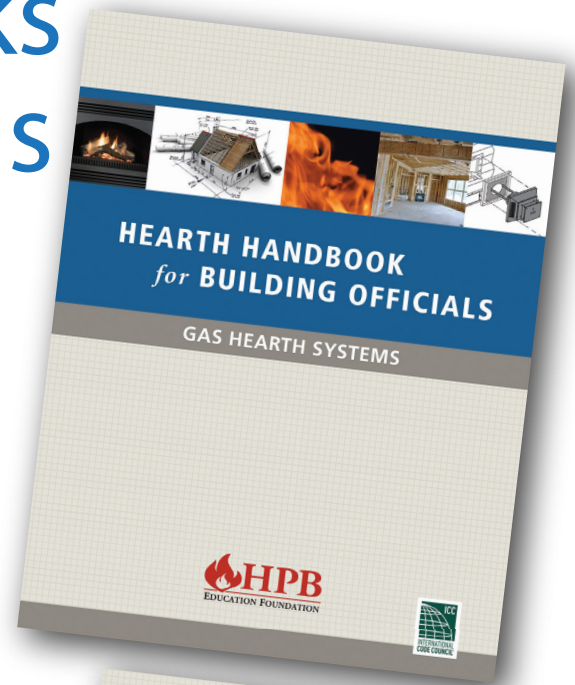

- Convenient source for clear, organized information on all major factory produced hearth appliances — fireplaces, fireplace inserts, freestanding stoves, gas logs — and their venting systems
- Time-saving quick-reference charts to easily find relevant codes
- Useful guide to variations in manufacturers' installation instructions
- Numerous illustrations, tables, and flow charts

Gas Hearth Systems

- Quick reference charts identify the sections of the National and International Fuel Gas Codes (1999-2003 editions) that apply to hearth installations
- Categories and descriptions of gas appliances by type and standards
- Categories and configurations of venting systems
- Guide to calculating combustion air needs and sources with calculation examples
- And much more!

Solid Fuel Hearth Systems

- Quick reference charts identify sections of NFPA 211 and International Residential Code (2000-2003 editions) that apply to hearth installations
- Complete coverage of categories of cordwood and pellet appliances by type and standard
- Categories and configurations of venting systems
- Guide to calculating floor protection requirements
- And much more!
